Dear Doctor:

Let me take the opportunity to introduce myself and the staff of the Range Animal Hospital. For 32 years my major interest has been in surgery; for the last 19 years that has been pretty much full time. In those years, we have assembled the staff, the equipment, but mostly the skills in carrying out some of the more complex procedures in veterinary medicine. This has been with rewarding results to our clients, ourselves, and mostly to our patients.

Dr. Stephanie Holloway joined our staff in 2010. She is mostly responsible for the medical cases of our practice, but she has a great interest in orthopedics. She is frequently scrubbed in those orthopedic cases, as well as any other soft tissue case that her schedule will allow. She is a great asset to our practice.

Along with Dr. Holloway, our staff includes Carolyn, Judy, and Ashley and a few other part time members. All of our staff is cross-trained, and you will find them in all areas of the hospital. Carolyn and Ashley have been designated as our referral coordinators, and as such you should ask to speak first with Carolyn and if not available, Ashley next, to arrange for a referral.

Your clients will find our hospital easy to navigate. Everyone is willing to answer questions, and all questions should be asked. Costs, prognosis, expected outcome, expected hospital stay, can I visit my animal are all questions that should be asked. Feel free to tell that to your clients, and they are your clients. Their care will be professionally handled.

Feel free to photocopy the information in this book for your clients. They always like to know what is about to happen, and it will give them a springboard to ask questions. Additionally, the enclosed disk has all this information and is easy to navigate. You can even load it on your computer for easy access from any location in your practice. Or you can access the same information on the web at www.rangeanimalhospital.com/referral and do so with the same ease of navigation.

We hope to be of great service to you, your clients, and your patients.

Sincerely,

Donald C. Martinson DVM
