# Discharge Orders

## Triple Pelvic Osteotomy

### Feeding:

- Feed high protein and meat type canned foods until healed. Meat is high in calcium and phosphorus, which is needed for bone healing.

### Exercise

- Your pet will require strict rest for 3 or 4 days.
- Your pet is limited to short leash walks for 2 weeks.
- Then your pet is limited to leash walks for 2 weeks more. About 2 city blocks 2 or 3 times daily is appropriate.
- Then your pet may exercise about the yard without vigorous activity for 3 weeks.
- Then, your pet may exercise as normal.

### Bandages:

- There are no bandages.

### Incisions:

- Check the incision each morning for swelling, redness, drainage or other signs of infection. Call early in the day if there is a problem. Call if you are not sure.
- We need to recheck the incision in 3 or 4 days. Please make an appointment with your regular veterinarian.
- Please make an appointment for suture / staple removal in 12 days, again with your regular veterinarian.

### Medications:

- Please read the instructions on the bottle(s) carefully. If there are any questions, please ask.

### Follow Up:

- Please call with a progress report in 3 weeks. We will discuss scheduling the second surgery at that time.
- If Doctor is not available to the phone that day, leave a message with the staff. Doctor will return your call.

### Instructions:
